OFFERS THE MOST COMPREHENSIVE
TELECOM SOLUTIONS

Solutions

Time attendance device / Access control

ACCESS CONTROL:

Access Control solution restricts unauthorized entry based on different checkpoints and conditions. Access Control protects an organization's assets and manpower by controlling users' entry based on their credentials. Access Control for SMB and SOHO helps organization secure single location with no server required. Both solutions come with advance access control policies integrated with the Door Controller.

TIME-ATTENDANCE:

Time-Attendance is an enterprise grade solution for organizations with multiple locations spread across geographic regions. It automates all Time-Attendance and Leave Management processes like recording entries and exits, real-time head counts, report generation and salary processing.

CAFETERIA MANAGEMENT:

Cafeteria Management software is a solution automating the process starting from placing an order to delivery, including the payment. It also allows item tracking, speedy transaction, and prevents wastage of food an error in accounting.

Solutions

CCTV SURVILLANCE SYSTEM

CCTV Security system is of crucial uses to protect your business from any possible threat of theft and vandalism. The CCTV Security system is used to record and monitor a live video feed which can be viewed later for Security and Surveillance Purposes. The recorded video feed can prove to be of great importance for both crime prevention and detection.

We offer a wide range of camera systems for commercial use satisfying all types of requirements including basic observation, commercial security, staff surveillance, anti-theft surveillance and access control surveillance.

Solutions

Audio and Video Solution Integration

In a world in motion, there is one constant: our mobile device, which increasingly is our office. Now, it is also a video conferencing platform.

The software application resides on android or IOS devices to extend

face to face collaboration and content sharing beyond the conference room.

Solutions
